Work Experience

Full Stack Developer @ Cuvette Tech Pvt. ⬀   Link
Ltd., Bangalore

Aug 2023 - May 2024 (8 months) | Part-time

cuvette helped me get this internship

- a project management app, where a user can create, edit, update, delete and assign tasks to himself and to his team members

- build the backend with authentication by using jwt bcrypt etc. React was used to build the frontend and providing the beautiful UI to the user. Used Postman to check and manage the RESTful API

- Users can view the analytics section for all the tasks, analytics is data for all the tasks created so far on the platform. Filtering of task based on date. Sharing the link of task with team members

Skills Developed: React.js, Javascript, NodeJs, MongoDB

Projects

CinePhiles Movie App   🔗 </>

- User can rate, add them to watchlist and get the movies recommended to them.

- Robust backend for APIs, MongoDB pipeline aggregation for getting the average ratings, A admin panel to add movies, use of cloudinary to store photos and trailers. Context api for frontend using react

- See the latest movie uploaded by admin. Watch trailers and info about the actors. Search and find the movies and review. Update your reviews. Management of movies by the admin

Skills Developed: MongoDB, React.js, Tailwind, NodeJs, ExpressJs

TrendSpot-SaaS   🔗 </>

- An application for Ecommerce websites to let them select the trending products for their website. An hassle-free way to get the info about the products.

- Use of Redux-toolkit for state management. Postman for APIs. Cloudinary to store images and videos. Sendgrid Email APIs to handle the email verification and contact info.

- An hassle-free way to get the info about the products. User can download images, videos, description, ad copies for their product and sell them easily in any platform they want

Skills Developed: Redux, React.js, MongoDB, NodeJs, ExpressJs, Tailwind
